INNOVATIVE **MOUNTING SYSTEMS**

THE
EFFICIENT
SOLAR MOUNTING SYSTEM
FOR SLOPED ROOFS

CLICKFIT BASIC

METALROOF

# SIMPLE CLICK SYSTEM, FAST INSTALLATION

With its unique click connection, Clickfit for steel roofs is an easy-to-install mounting system for sloped roofs. The system distinguishes itself with its innovative design and is therefore very easy to install, without making concessions to quality. The mounting system is constructed of the patented mounting brackets, mounting rails and the necessary mounting materials to mount the solar panels on the mounting rail in a way that follows the shape of the roof. The Clickfit mounting system for steel roofs can be used for all steel roofs, including the commonly used steel corrugated sheets and trapezoidal roof sheets.

- Quick and easy mounting
- Unique click system
- Also available in black finish
- 100% Dutch product
- 20-year guarantee
- BDA/KIWA-certified

Guaranteed quality!
Clickfit has been extensively tested and certified by BDA/KIWA and fully complies with the applicable requirements and standards of the NEN7250. The Clickfit mounting system for steel roofs comes with a unique 20-year guarantee, which ensures the quality of the system and offers the certainty that is required.
